

## FRED

### Ultrafast Soft Recovery Diode, 60A

#### Features:

- Ultrafast Recovery
- 175°C operating junction temperature
- High frequency operation
- Low power loss, less RFI and EMI
- Low  $I_R$  value
- High surge capacity
- Epitaxial chip construction

| Product Summary |       |
|-----------------|-------|
| $V_R$           | 400 V |
| $I_{F(AV)}$     | 60A   |
| $t_{rr}$        | 30ns  |

#### Description/Applications

These diodes are optimized to less losses and EMI/RFI in high frequency power conditioning system. The soft recovery behavior of the diodes offers the need as snubber in most applications. These devices are ideally suited for HF welding power converters and other applications where the switching losses are not significant portion of the total losses.
